NEW CLASSIFICATION FOR STORAGE AND RETRIEVAL SYSTEM

The department is introducing 3 new classification for lifting equipment to cover the storage and retrieval system used commonly in warehousing industry. The storage and retrieval system are to be classified under **lifting platform (LP)**. The descriptions of the new classifications are as follows:

Code	Name	Description
805	Storage And Retrieval System (with operator's cabin and travel on rails)	<ul style="list-style-type: none">• The machine is equipped with on-board operator's cabin / controls, i.e. the operator would be lifted up together with the goods.• The entire platform can only move within a system of rails.
806	Storage And Retrieval System (with cabin and by wheels)	<ul style="list-style-type: none">• The machine is equipped with on-board operator's cabin / controls, i.e. the operator would be lifted up together with the goods.• The entire platform or machine is free to move about on wheels and not confined within the racking system.
855	Storage And Retrieval System (for materials only)	<ul style="list-style-type: none">• The machine is not equipped with an on-board operator's cabin / controls, i.e. the platform is strictly for materials only, and the operator does not ride together with the goods on the platform• The entire platform can only move within a system of rails.

Yours faithfully,

SILAS SNG WEE KIAT

for CHIEF INSPECTOR OF FACTORIES
